

The **Metrobank Trust Banking Group – Equities Investment Department** obtains the target prices of Philippine Stock Exchange Index (PSEi) member stocks from its Tier 1 brokers.

The average of the target prices of each broker per company is computed in order to arrive at the Distance to Target.

***How to read Distance to Target:**

If the analysts set a target price that is higher than the current price, it means they expect the stock price to rise in the future. If the price target is lower, they expect the stock price to fall.
